LaTeX

Binomial Theorem

$$f(k) = \binom{n}{k} p^k (1-p)^{n-k} \tag{1}$$

Hello Equation 1

This theme supports special LaTeX macros \beingcols and \endcols
that allows for markdown to be blended with LaTeX without triggering the
raw_tex extension. To enable this feature, the safe-columns key in the
YML head matter must be set equal to true.

- *Hello!*

1. **Goodbye!**

Code Embedding

```
# Embedding code
x = 2
y = 3
x + y
```

```
## [1] 5
```

Inline R code refering to variable in previous code chunk:

2

Plot

Pretty, colorful text

This is the color red: color red
